3 **ABSTRACT**

4 Described herein is a technology facilitating circumvention of dynamic and
5 robust detection of one or more embedded-signals (e.g., watermark, copyright
6 notice, encoded data, etc.) in one or more input carrier signals (e.g., multimedia
7 stream, video stream, audio stream, data, radio, etc.). This abstract itself is not
8 intended to limit the scope of this patent. The scope of the present invention is
9 pointed out in the appending claims.
